WATER AWARENESS MONTH - MAY 2016**

**WHEREAS**, California's arid and semiarid climate, its ambitious and evolving economy, and its continually growing population have combined to make shortages and conflicting demands the norm; and

**WHEREAS**, The rising concern of Climate Change could limit the state and federal governments water infrastructure due to less snow pack; and

**WHEREAS**, the health, welfare and quality of life for our community depends on a reliable, high quality water supply; and

**WHEREAS**, the need to develop a diverse portfolio approach to water supply reliability that includes a balanced combination of conservation, water reuse and new supplies is critical to our region's future; and

**WHEREAS**, municipal agencies and governments continue to seek cost-effective and efficient systems to obtain and deliver water to meet the needs of residents, agriculture and the economy; and,

**WHEREAS**, the state, county, cities and concerned citizens make strong efforts to foster wise decisions concerning water issues and water use; and,

**WHEREAS**, home water use and wastewater production can be significantly reduced by finding and repairing leaks, replacing inefficient toilets, washing machines, water softeners, and adopting personal water conserving practices; and

**WHEREAS**, the fact that California will experience periodic droughts and water conservation is critical not only during drought periods, but at all times; and

**WHEREAS**, landscape irrigation makes up over half of home water use - a percentage that can be significantly reduced by adjusting and monitoring irrigation systems and adopting water efficient landscaping and gardening practices; and
